

EF Core Query

```
public List<Customer> Query()
{
    return ctx.Customers
        .Where(c => c.CreditLimit > 2000 || c.CreditLimit == null)
        .Where(c => c.AccountOpenedDate >= '2025-01-01')
        .OrderByDescending(c => c.Name)
        .ToList();
}
```

ENTITY MAP

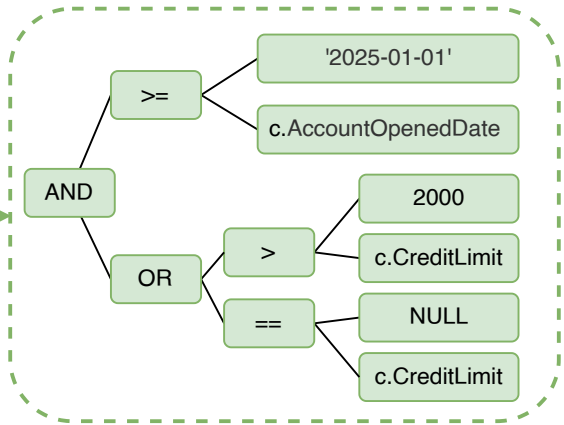

PARSING PHASE

Intermediate Representation

1 FROM Sales.Customers, alias: c

2 WHERE :tree

3 ORDER_BY c.Name, asc: false

BUILDING PHASE

Dapper Query

```
public List<Customer> Query()
{
    return connection.Query<Customer>(
        """
        SELECT *
        FROM Sales.Customers AS c
        WHERE (c.CreditLimit > 2000 OR c.CreditLimit IS NULL)
              AND c.AccountOpenedDate >= '2025-01-01'
        ORDER BY c.Name DESC
        """,
        ).ToList();
}
```
